

The power of digivu combined with our card reading technology

A low cost combination for Driver Card and VU Download

Simple plug and play

The power of digivu has been combined with our card reading technology to give you a low cost yet highly efficient way to download Vehicle Unit and Driver Card data.

Purchase a digivu+ and you can read and store both Driver Card and VU on the digivu. The digivu+ is powered by an independent battery source, which in turn powers the digivu.

Seamless data handling

digivu will store all of the Driver Card and Vehicle Unit data until you connect it to a PC. When you connect to a PC all of the data is automatically downloaded by our proprietary software, digiconnect. The digivu is supported by all the major UK analysis bureau. No additional software setup, beyond the standard digivu setup, is required to support digivu+.

Low cost and flexible

digivu was already cost effective, yet most efficient method of downloading Digital Tachograph data from your vehicle. The additional card reading functionality makes a great product even better in terms of functionality, speed, convenience and cost.

The digivu+ is compatible with all types of analysis software and is supported by all the major analysis bureau.

1)

2) digivu carries all of the data

3) Dock your digivu to a PC to transfer Card and VU Data
